AUGUST 21ST

FALL VEGETABLE GARDENS: EXTENDING YOUR HARVEST

Late summer is the time to plan and plant for your garden's third productive season! Vegetable gardening for the year does not have to end with tomatoes and cucumbers - let's talk timing, to maximize your garden's yield with fall and even winter crops. We'll also discuss season extenders and other tips and techniques to keep your garden growing well past the first frost.

SEPTEMBER 18TH

SPRING FLOWERING BULBS

For fabulous flowers in spring, plan ahead and plant some bulbs after the first autumn frost. Flowering bulbs like daffodils, hyacinths, and crocus are among the earliest flowers every year - some even start to bloom as early as January! Bulbs can be planted in flower beds, in lawns, under and around trees, or grown in containers - many will come back and even multiply for years of beauty with minimal care.

OCTOBER 30TH

COMPOSTING AND VERICOMPOSTING: RECYCLING WITH NATURE

What to do with all those leaves? Let's talk rot! Composting is a great way to recycle natural materials into a fantastic organic amendment that improves your soil and helps everything grow better. We'll discuss a few ways to start composting in your own backyard, and what should and shouldn't be composted. We'll also go over the easy steps for having a successful "worm bin" at home.
